GITHUB PROFILE README

Mechanical Engineering Student Portfolio

Hi, I'm Ilavarrasan R G!

Mechanical Engineering Student | CAD Design Enthusiast | Future Mechanical Engineer

Welcome to my GitHub profile! I'm a passionate Mechanical Engineering student interested in mechanical design, CAD modeling, product development, and advanced manufacturing technologies. I enjoy exploring innovative engineering solutions and combining mechanical engineering principles with modern digital tools.

About Me

- Pursuing a Bachelor of Engineering (B.E.) in Mechanical Engineering.
- Interested in mechanical design and product development.
- Learning and improving my skills in SolidWorks and MATLAB.
- Exploring 3D modeling, prototyping, and 3D printing.
- Interested in innovative engineering projects and practical problem-solving.
- Always eager to learn new technologies and develop my technical skills.

Technical Skills

- **CAD Software:** SolidWorks
- **Programming and Analysis:** MATLAB
- **Design:** 3D Modeling and Mechanical Drawing
- **Manufacturing:** 3D Printing and Prototyping
- **Engineering:** Mechanical Design and Product Development

Projects

I'm working towards developing practical engineering projects that combine mechanical design, innovation, and modern manufacturing. Areas of interest include:

- Mechanical component design using SolidWorks
- 3D modeling and printing projects
- Product design and development
- Engineering drawings and assembly design
- Innovative mechanical engineering solutions

Currently Learning

- Advanced SolidWorks modeling
- MATLAB for engineering applications
- Product design and development
- Modern manufacturing technologies

Connect With Me

I'm interested in connecting with fellow engineering students, designers, and professionals to learn, collaborate, and share ideas. Add your GitHub, LinkedIn, email, and portfolio links here.

"Engineering is not just about designing machines; it is about designing solutions for the future."

How to use: Copy this content into the README.md file of a public GitHub repository named exactly after your GitHub username. Replace or add any project details and profile links before publishing.
